## Mission

- The Koninklijke Bibliotheek is the national library of the Netherlands: we bring people and information together
- Our aim is to:
  - offer everyone everywhere access to everything published in the Netherlands
  - play a central role in the (scientific) information infrastructure of the Netherlands
  - promote permanent access to digital information nationally and internationally

## How do we translate these words into practice?

- Mass-digitization:
  - between 2009 and 2013 10% of all Dutch publications will be digitized
  - public-private partnerships (Google, ProQuest)
  - standardized workflows for digitizing of Books, Magazines and Newspapers
  - preservation by means of digitization
  - designating digitization part of the library's primary process

## Results so far

Project	Timeline	Pages
Dutch Parliamentary Newspapers	2004-2010	2.500.000
Dutch Daily Newspapers	2007-2012	9.000.000
Early Dutch Books Online	2008-2010	2.000.000
Magazines	2009-2011	1.500.000
Google	2011-2014	30.000.000
ProQuest	2011-2016	6.000.000
Metamorfoze (Books, Newspapers and Magazines)	2012-2013	9.000.000
<b>Totaal</b>		<b>60.000.000</b>

## Post digitization challenges

1. Improving results of Optical Character Recognition
2. The costs of running two libraries
3. Setting up a viable model for cooperation at national level

**NOTICE to SHIP**  
follow the Somnauth  
ship SCHAH JEHAN, 758 ton  
E.I.C. Service, Commander.  
from China, and will load in  
poop accommodations for pa  
freight or passage apply to H.

...ch be paid  
over by the  
man. It is  
H. I. C.  
No freight or  
passage apply  
to H. I. C.  
the political  
and naval, the  
and be known thereupon

**GIVING AWAY!**  
The NATIONAL LINE EMPORIUM,  
205, STRAND, W.C., require  
to whom either sets to recommend  
NEW PATENT EASY FASTENING  
and SET D.S. caused in heavy  
very hard wood. AS AN INDUCEMENT  
we will on receipt of P.O. 2s. 0d.

# Challenge 1: Improving results of OCR

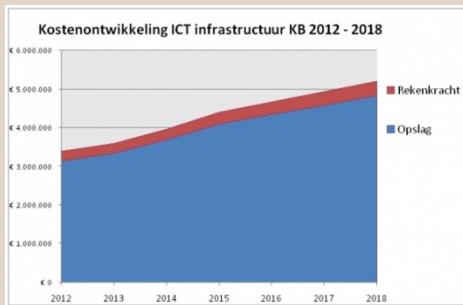

- Problem:
  - Target groups, especially linguists, value high quality OCR but poor recognition rates of software means pre 1850 OCR can often not be used for research
- Approach:
  - Use results of the European Project IMPACT (<http://www.impact-project.eu/>) within KB's digitization workflow (2012)
  - Introduce crowdsourcing to improve OCR of individual texts to a high degree of accuracy (2013)
  - Expectation management

## Challenge 2: the costs of running two libraries

## Challenge 2: the costs of running two libraries

- Problem:

- Approach:
  - Long-term storage planning & rethinking of storage policies
  - Reduce costs of the physical library
  - Creating a digital mindset: shift of focus from physical collection to the digital collection

## Challenge 3: Cooperation

- Problem:
  - Fragmentation caused by lack of coordination of digitization efforts
  - Lack of standardization and different interpretations of metadata standards
- Approach:
  - Centralized mass-digitization financed by Metamorfoze (National Programme for Preservation of Cultural Heritage)
  - Create ‘national infrastructure’ to provide permanent access to digitized heritage collections in partnership with Dutch academic libraries
  - Promote Open Access and use of dataservices (via OAI-PMH/SRU)
