A. M.

2 Dec 1871

[L.]

1. The first of these is the
 fact that the population of
 the world is increasing at
 an ever increasing rate.
 This is due to a number of
 factors, including improved
 medical care, increased food
 production, and a general
 decline in mortality rates.
 The second factor is the
 increasing demand for
 resources, particularly
 energy and raw materials.
 This is due to the growth of
 the industrial and service
 sectors of the economy, and
 the increasing consumption of
 goods and services by the
 world's population.
 The third factor is the
 increasing awareness of the
 need for sustainable
 development, which is
 development that meets the
 needs of the present without
 compromising the ability of
 future generations to meet
 their own needs.
