New York (UPI) — Why do we connect trees and lights with Christmas? There are several stories concerning the origin of the Christmas tree. Scandinavians once worshipped trees, and, explained World Book Encyclopedia, they made evergreen trees part of Christian festivals when they became Christians. One legend tells how the first Christmas tree was shown in a miracle to the English missionary Winifrid (later called Boniface). More than 1,200 years ago, while traveling in what is now northern Germany, Winifrid found a group of heathens at an oak tree, about to sacrifice a child to the god Thor.

New York (NAPS)—This article is for adults only. Kids don't have to read it, because anybody born since 1945 has grown up in the Atomic Age and presumably know all about the new nuclear reactors which keep appearing... around the countryside, in our ports, and even overhead. For us oldtimers, however, the term itself is deceptively simple. Most people think instinctively of a "reactor" as an atomic gadget that somehow pours electricity into the area's power network. Not necessarily so! Of some 280 nuclear reactors now operating in the U.S., only 15 are "central power stations" which fit that description. The rest are being used for anything from teaching students to producing new flower strains.
