Algorithmus Lincalis cū pulchris conditionibus dum regulas
De tri una de integris: altera vero de fractis: Regulis
q̄ socialib⁹ ⁊ semp̄ exemplis idoneis
ad distinctis. In florentissimo studio Craconiensi editus
nō minus literis eruditis q̄ mercatoribus
utilis: ⁊ maxie incipientibus.

Joannes de Lancet arcem sibi agister Lectori Salutem.

Magna profecto lector candidissime utilitas promptitudinē & comodi contibet homini numerorū cognitio affert: que a paucis quantum honoris. laudisue habeat: quanta denique auctoritate probata sit. dictu haud facile existimo. plerumque enim ignorantiam numeri totius quadratum incertitiam sequi necesse est. Solis enim Arithmetice preceptis omnē calculandi / nūmerādiq; noticiā haberi dubitat nemo. Quis queso quacuq; in scientia (hac ignorata) proficere poterit: cum omnia certo in numero primo ab opifice condita sint. hinc etiam sancti Augustini verbum nec dissentit dicentis. Nemo ad divina humanarūq; rerū cognitionē accedat / nisi prius artē nūmerādi bene addiscat. Sic igitur vos diligentissimi litterarū alūni / rudimenta eiusce artis proorsus laterēt. o pulchellū numerorū species / & quidē p̄ lineas / q̄b; multo celerius in nūmerorū cognitionē q̄ p̄ figuras significatas pervenit opportunitatē tēporis nactus in publicū prodire sinis: quod tū lector optime. p̄ viribus adhibita diligentia lege. bona etenim polliceorū fide / si hoc frequēti versatione manibus tractaveris. necnō in eo clausa tenaci mādaveris memorie / ad maiora & uberiora te promptissimū reperies. Vale Data Lrae coure sexto Kalendas Martias. M. D. Xij.

Notandum q̄ Invenitur p̄m̄ Guisq; de p̄p̄t̄e r̄t̄i
v̄re apud grecos (ut autē) Peragrat p̄m̄ r̄p̄t̄e
in latinū quōdā Apuleius tam deinde deinde r̄p̄t̄e

Quis dicitur et dicitur. Quia dicitur de illi qui facile se docent
dicitur vero de qui aptius nati sunt docere

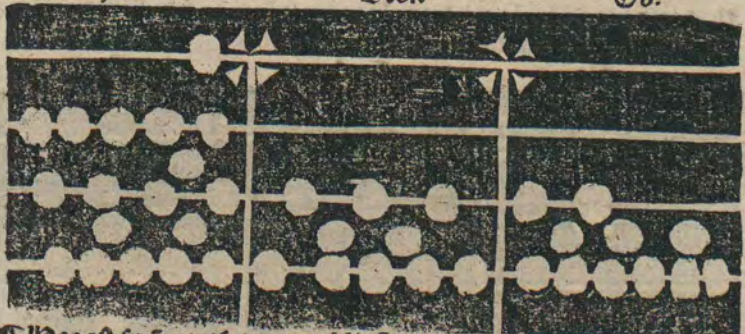

Iste liber principaliter dividitur in duas partes. Prohymio
et reprobatione. Eximium p̄t̄e r̄p̄t̄e r̄t̄i. Ut autē quōdā
m̄t̄e p̄t̄e r̄p̄t̄e r̄t̄i. Ut autē quōdā
humani v̄re p̄t̄e r̄p̄t̄e r̄t̄i. Ut autē quōdā
et dicitur v̄re p̄t̄e r̄p̄t̄e r̄t̄i

Handwritten notes in the right margin, including the word 'Figura' at the bottom.

quolibet numero

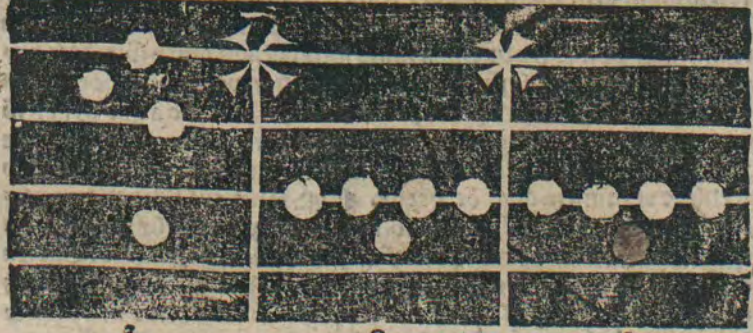

Numero quinario vnus p[er]iectilis in primū ponat spacium. Sed
 p[er] quinquagenario vnus in scd[us] ponat spacium: & sic p[er]iter p[re]cedēdo quo
 usq[ue] omnes p[er]iectiles numeros earūde[m]: vel diuersax r[ati]o in vnā cōpor
 tatione summa. Exempla s[ub]scripti numeri in vnā addantur summam

De mediatione

Mediatio est numeri ypositi in duas ptes diuiso vt videat medietas relicta. Et ergo aliquē mediare volueris numerū. ipso vt supra in si-
 neas reposito ab inferiori linea incipiat opatio: ita vt medietas pecti-
 liū in linea ⁊ spacio immediate superiorū sup eandē alterius: vel eiusdē cā-
 pi lineā reponat. sic ascendēdo quousq; totus numerus mediatus fuerit.
 Quo facto: si opationē pbare volueris mediatus dupla: ⁊ ecōtra in du-
 platiōe duplatus mediā. q; si idē qd prius enenerit. bñ opatū est. Note-
 varia etiā collectiōe sic poteris expiri: accipe pbā mediati: ⁊ eā duplas:
 coi si pbā numeri mediati equabil. tūc bñ actū est. Exm est subiectū.

Mediandus. 137
